

KNIVES FOR CUTTING DUCTBOARD AND INSULATION

- Ductboard knives have heavy gauge blades made from high carbon steel that are hardened, ground, and honed to an extra sharp edge to cut cleanly through ductboard.
- Ductboard knives are available in two blade lengths -- 4" and 6".
- Ductboard knives are available with or without the safety guard, which increases safety and acts as a finger stop for cutting with increased pressure.
- Ductboard knives are made in the USA.

SAFETY GUARD helps to prevent accidents and also acts as a finger stop for cutting with increased pressure.

MODEL #	DESCRIPTION	WEIGHT
DR68020	Ductboard knife, with guard, 4" x 1"	0.150 lbs.
